**Kharkiv Educational and Scientific Institute**

**SHEI "University of Banking".**

In general, political, economic, scientific and sport life of the world "runs" in English. English is an official language of the Organization of United Nations. Various summits and meetings of state leaders, negotiations and debates are conducted in English. International trade, banking system, transport system activities on land, at sea and in the air are performed in English. This language is an instrument of communication between academics, doctors, scientists around the world. English is chosen as an official language of the Olympic Games and various competitions among countries.

The value of English in today's world is so large that its knowledge is not the privilege and luxury. It is the key to future of self-education and self-improvement. So now there are so many organizations offering to teach you English. Don't you want to travel and to communicate with people of different nationalities? Don't you want to become a student at a foreign university? Don't you want a prestigious job with the promotion of the career ladder? Or don't you want to work abroad? Tip one - learn English. After all, sometimes you still realize that 75% of the world correspondence is made in English, 80% of the information stored on computers is also in that language, and the majority of international documents, articles, literary works, namely written instructions in English. And we have not yet considered the film industry and music Olympus. American-made films become part of our lives, and any pop singer considers prestigious sing at least one song in English.

The knowledge of English in today's world is a kind of window into the world. With the knowledge of foreign language you can achieve your goals with new opportunities. And you must understand that the importance of English is not exaggerated.
